Matúš
Tatarko

JUNIOR FULLSTACK DEVELOPER

Motivated Junior Fullstack Developer and fresh graduate of Green Fox Academy. Prior to pursuing a career in web application development, I obtained a degree in Automation and Informatics of Machines and Processes at the Slovak University of Technology in Bratislava. I was so interested in automation that after graduation I worked as an industrial robot programmer, mostly on projects for German automobile manufacturers. Through these years I came across a lot of new technologies and procedures used to build a car body's frame. That helped me to develop technical thinking.
